

This is StelCrete

StelCrete is in the business of manufacturing and supplying assembled reinforcing and structural steel components to the precast concrete and civil engineering industries. The company focuses its core business on concrete precasters; highway and road construction; residential, institutional, and commercial construction; underground and above ground utilities; agriculture, public works, and custom design for engineers, contractors, and architects.

StelCrete's customers regard the company as the outsourced solution for their reinforcing needs, thereby ensuring product quality, superior service to their clients, and in many cases - substantial net savings due to significantly reduced labour, materials, and overhead costs.

StelCrete is CSA-approved and CWB-certified for all welding applications used at its plants located in Niagara Falls and Fort Erie, Canada. It is structured to provide high volume repetitive sub-assemblies as off-site inventory, or just-in-time delivery.

StelCrete is part of the **Salit** group of companies. Salit is an Ontario-based steel service centre and rebar fabricator established in 1905 by its founder, Myer Salit.

REINFORCING ASSEMBLIES FOR:

Concrete Pipe, Boxes, and Manholes

- manhole base rebar mats
- pipe plugs
- rebar mats for tunnel sections
- pipe and box culvert headwalls

Bridge Structures

- rise and span reinforcement assemblies
- girder cages
- reinforcement cages for columns and piers

Culverts, Small Bridges and Chambers

- box girder cages
- mats for load bearing culvert slabs
- mats for foundation bases
- built-in dowels for joining wing walls and head walls

Concrete Stairways

- pre-welded assemblies complete with platforms and landings
- cages for monolithic structures
- bracket reinforcing
- connection rods

Pulp and Paper Mills

- reinforcing cages for grinding stones

Tanks and Vaults

- reinforcement assemblies for septic tanks and underground storage vaults

Median Barriers

- OPSD connectors
- MTQ connectors
- barrier bolting
- anchorage angles
- reinforcement

REINFORCING ASSEMBLIES FOR:

Bridges

- decks
- wing walls
- beams
- abutments
- footings
- footbridges
- girder cages
- reinforcement cages for columns and piers

Culverts and Drains

- cast-in-place structures
- head walls
- box girder cages
- mats for load bearing culvert slabs
- mats for foundation bases
- built-in dowels for joining wing walls and head walls

Retaining Walls

- pre-welded mat assemblies and anchors
- connection rods

Water Treatment Plants

- reservoirs
- foundations
- pump stations
- administration buildings

Transformer Stations

- foundations
- site works
- anchors

Wall, Floor, and Ceiling Slabs

- beams
- slab shear
- reinforcing

REINFORCING ASSEMBLIES FOR:

Wastewater Treatment Plants

- clarifiers
- foundations
- administration buildings
- grit chambers
- dewatering buildings
- site works
- pump stations

Pumping Stations

- sump structures
- pump houses
- site works
- stairways
- platforms
- foundations

Foundations

- reinforcing
- mats
- caisson cages
- columns

Utility Galleries

- mats
- cages

Light Standards

- wire cages
- foundation mats

Encasements

- cages and mats

Epoxy Coated Steel

- landfill projects

Cast-in Hardware, Lift Hooks, Weld Plates

- plain or galvanized

Reinforcement

- mesh
- cut-to-size wire stock material
